

Order 34 Mid-Year Workshop

Open Cut Session

Wednesday, 5 June 2024

Cindy James
Order 34 Manager

Acknowledgement of Country

We acknowledge the Wanaruah, Wonnarua People as the traditional owners and custodians of the land within the Hunter Valley area.

We pay respect to all Aboriginal Elders, past, present and future with a spiritual connection to these lands.

Evacuation

In the event of an emergency there are tones that operate throughout the building. There is a pre-tone that leads to the full evacuation alarm.

- Location of Exits and Emergency Evacuation Points
Primary location - outside front gate
Secondary location in Vehicle Extrication Area
- The site Emergency Warden is the Office Administrator (Taylor/Libby).
Upon evacuation you must report to the Warden

Facilities

There are several toilets on site:

- M/F toilets near front administration
- M/F toilets off the main crib room
- M/F toilets at bottom of stairs off the B/A room

Smoking is prohibited within the boundaries and 10 metres outside the boundary of Mines Rescue.

Today's program

Time	Agenda item	Presenter
9 am – 9:15 am	Registration + Morning Tea	
9:15 – 9:20 am	Welcome and Overview	Cindy James (Order 34)
9:20 – 9:30 am	Introductions/ General Discussion	Group
9:30 – 9:45 am	Industry Update	Cindy James (Order 34)
9:45 – 10:30 am	CMI Industry Data	Ricky Aldana (Coal Mines Insurance)
Break – 20 minutes		
10.50 – 11.20 am	Training Compliance Reporting	Col Lawson (Hunter Valley Operations)
11.20 – 12 pm	Networking Activity	Group
Lunch – 30 minutes		
12:30 – 1 pm	Order 34 Kahoot Team Challenge	Group
1 pm – 2 pm	Thiess Paperless Training & Assessment	Thiess
2 pm – 2:10 pm	Coal Services New MoC App Demo	Cindy James (Order 34)
2:10 pm	Summary and close out	Cindy James (Order 34)

Introductions and General Discussion

Resources Regulator Incident Summary

5 May 2023 – 3 May 2024

2,150 Reportable Incidents for All Sectors

132 Reportable Incidents Summaries provided for All Sectors

89 Reportable Incidents Summaries provided for the Coal Sector

46 Reportable Incidents Summaries provided for Open Cut Coal Operations

Resources Regulator Incident Summary

5 May 2023 – 3 May 2024

Notifiable Incidents where Summary provided by the Resources Regulator

Open Cut Incidents

Training and Competency

Category	Comments to Industry
Fire or explosion	Workers must be regularly trained in how to respond in an emergency such as a fire on plant. Training should reflect the systems and lay out that workers will be operating in, including activation of e-stop and fire suppression systems.
Mechanical maintenance	All workers conducting pressure testing should be trained and assessed as being competent in that SWP.
Roads or other vehicle operating areas	<p>Workers should be provided adequate information, training, and instruction regarding updates to bulk push designated zones and the requirement to remain inside the zone.</p> <p>Following a recent awareness campaign on vehicle interactions the Regulator published a video that can be used for training purposes and toolbox talks. Mine operators are encouraged to use this resource. You can watch the video on YouTube.</p> <p>Mine operators should ensure that all haul truck operators are familiar with emergency braking procedures and that operators are competent in the application of emergency brakes. Truck operators must remain situationally aware when maneuvering a truck near windrows and dump drop-offs and should use the service brake in emergency situations.</p> <p>Situational awareness is a key control when operating mobile equipment. Workers should be trained in the importance of this control and include it in their pre-task risk assessment.</p>

Bulldozer incident increase

66	56	10
incidents reported to the Regulator since January 2022	occasions reported there was physical equipment damage	incidents reported as a potential for injury or illness

The Regulator’s review identified the following contributing factors:

- operators have not identified all the hazards in their workplaces
- operators and supervisors have not maintained standards in their work areas including windows, demarcation of work zones, light vehicle park-up areas and exclusion zones
- operators have not maintained control of dozer work areas
- a lack of positive communication between operators that is repeatedly a factor in collisions
- several instances when operators and supervisors did not identify the need for positive communications.

Human and organisational factors data review

An independent review has found that **74%** of human behaviours associated with safety incidents and accidents over the past 5 years **were due to unintentional error by individual workers**.

23% of behaviours were assessed as intentional or routine non-compliances. There were no instances of intentional harm or sabotage.

The NSW Resources Regulator engaged the Keil Centre to undertake a comprehensive, independent data review of all human and organisational factors analyses undertaken by the Regulator between August 2018 and May 2023. The data comprised human and organisational factors analyses related to 267 notifiable incidents with 180 incidents at surface mines and 87 at underground mines.

The Regulator's human and organisational factors analysis tool (S-HOF) was designed in 2017 to analyse the human behaviours associated with safety incidents and accidents. It considers both unintentional behaviours (errors) as well as intentional non-compliances with rules or established processes. It also accounts for the performance shaping factors (from individual through to organisational level factors), which influenced the behaviour. The purpose of the S-HOF analysis was to identify and implement systemic changes that would help reduce unsafe human behaviours that lead to adverse safety incidents.

Refer to [Fact sheet – HOF data review](#) dated 24 January 2024

HUNTER VALLEY
OPERATIONS

Management of Training Reporting Tools

I'll come back to this

27 > The Why

As “training professionals” we function at the system process & levels in the management of all training at our operations, some do exceedingly well and, and some don’t. It’s not for the lack of trying as we all know what the expectation is under Order 34, reliable efficient reporting options available to us are one of number of factors at play here.

We all organise a manualised or Scheduled automatic report looking for skill **currency** and the **expired** so we can assign resources to address. Reporting on the TNA skills gap, the “blanks” I like to call them is another area we all investigate.

Coupled with the above, If we then include how many skilled operators required per each piece of equipment for production or other specific tasks on site it can become time consuming or even cumbersome to manage and what about budgeting forecasting.

Good reporting tools for live data that are easy to use or understand can assist us all drive improvement.

Potential Solution

The HVO HST Manager suggested I investigate the benefits of PowerBi as the Health & Safety(*The Dark Side*) had been developing reporting tools never seen or used before. I'd resisted for a few months until a demonstration by Dave Sullivan from "Data Inseyets" had provided an entirely new perspective. With Dave's mindset that "nothing in this space is impossible", we went to work.

PowerBi supplies us with data reporting in real-time. The functionality has removed the need to run those manualised or Scheduled automatic reports I mentioned previously. With good reliable data accessible to PowerBi for me the reporting opportunities are endless at the click of a button.

The varying reporting tools the Training Team has envisaged & put forward to Dave to create for the planning and delivery are things I'd never thought possible. What's even better is the they can be customised for presentations for communication to department stakeholders or access the applets themselves.

Demonstration

I might add, the I.T requests to have access to PowerBi HST data has increased significantly so much so it's forcing a change of stance in relation to access. The reason, the applets are simplistic to use and understand that non-training professionals can understand the data displayed.

A comment was made to me, “You’re doing yourself out of a job”. I personally don’t agree, What I have noticed is these reporting improvements have provided my team & I more time to devote to other areas of training management.

Rather than listening to my monotone voice that will eventually put you to sleep, I’ll demonstrate how the development of these reporting tools has assisted HVO in driving improvements in training.

Our time at HVO has seen us develop automated solutions in....

- HST Department
 - Training reporting platform > TNA in progress
 - Weekly HST report
 - Monthly HST report
 - Quarterly HST report
 - Controlled Document interactive tool
 - TVL (Safety Interaction) Allocation Tool + reporting
 - CMO Data Quality Assessment tool (TBC)
 - Safety reporting platform
 - Health reporting platform
- HR Department
 - Attendance Management (workforce) reporting
- Business Improvement Department
 - Self Fuelling project reporting

We also have ongoing work at....

- Glencore
 - Mt Owen / Glendell – HST Department
 - UWJC – HST Department
 - Ravensworth (scoping now)
- Yancoal
 - Moolarben – HST Department
- We have developed an in-house Teams to Power BI Report.

Our Value: we provide common sense but reliable data solutions that are easy to use and make sense to the end users.

We can also develop in Power Automate with Power Apps capability being added internally in the near future.

Remember this?

With the tools that sites are developing within the PowerBi space, the measuring part just got easier.

HUNTER VALLEY
OPERATIONS

Networking Activity

Speed Meeting

Speed Meeting

How does it work?

1. Split into 3 groups
(use 2nd, middle and last row of tables and turn around from the row in front)
2. Set up with everyone standing facing someone and ability to move clock-wise
3. You will have 1.5 mins with each person

Questions to ask:

1. What is your name, role and site?
2. How long have you been working in this job and in mining?
3. What is your favorite—and least favorite—part of your job?
4. What would you change about your job if you could?

Lunch Break - 30 mins

Order 34 Kahoot Challenge

Order 34

Kahoot! Challenge

Ready... Set....

- ✓ Competing in groups of 4 - **one device per group**
- ✓ **Pick a team name and nominate a captain** who will enter your team answers via the device
- ✓ There will be **10 questions** about Coal Services and Order 34
- ✓ Answer all questions within the given time limit. Points are awarded based on correct answers and speed

GO!

- ✓ Have some fun, collaborate, and uncover how well everyone knows Order 34
- ✓ There is a prize for the winning team, so it's **GAME ON!**

Paperless Training and Assessment in Operation

Thiess

THIESS

Introducing LAAMP to Industry

5-6 June 2024, NSW Coal Services, Singleton

Discover • Accountable • Respectful

THIESS

Introduction...

- ❖ 15 years in delivery of infrastructure projects
- ❖ 5 years in delivering operational systems transformation

THIESS
Group Manager
Business Optimisation

- ❖ 20 years in project delivery heavy Industries and Software
- ❖ 7 years delivering IT solution to industry

THIESS
Business
Development

- ❖ 19 years in mining and resources, focused on Training, Development & Safety
- ❖ 7 years at LAAMP

LAAMP
CEO
& Founder

Magic happens when...

meets

Stages of Change...

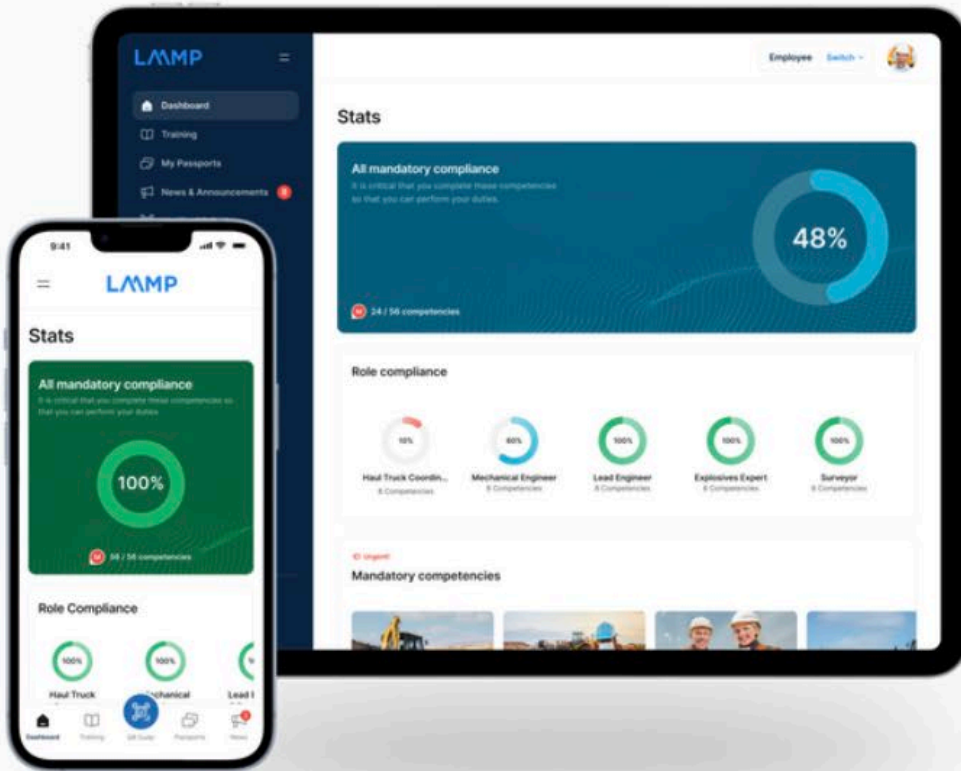

THIESS

Business Challenges

- Resistance to change
- Constrained by illogical workflows
- Duplicated effort
- Constraints of existing systems
- Non-responsive vendors

Our Vision for LAAMP

Protecting our people and enabling a shared workforce

✓ Mobilise faster and more effectively

1. Setup Environment

Replicate your global structure with ease

2. Set Permission Control

Set permission hierarchies to ensure security and proper workflow, granting access to authorised personnel only.

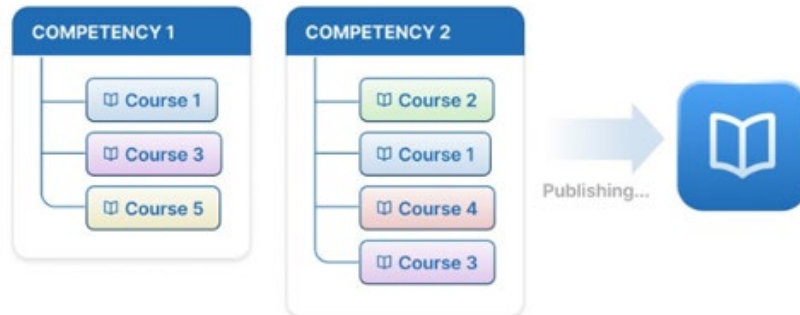

3. Publishing Competency's

Courses include, Resource libraries, SOPs, certifications, licenses, logbooks, simulations, theoretical and practical assessments and VOC.

Create Courses

Create Competencies

4. Distribution

5. Undertaking Training

After completing courses there is an approval workflow. Upon completion users receive a digital passport.

THIESS

Pre-Mobilisation

Facial Verification

Verify people & maintain integrity across assessments

Transferable Passports

Transferable skills and qualifications in your pocket

Immersive Technology (VR&AR)

Improve engagement and retention of your people

Multilingual

Ready for a diverse and global workforce

Training Automation

Automate training, assignment delivery and workflows

Audit Trail

Comprehensive digital audit trail ensures no lost records

Group Training

Combine the benefits of digital classrooms with remote participation

Reporting and Insights

Better understand your people and organisation

GATE CONTROL

Offline and Online

Access LAAMP anywhere anytime on any device

Digital Evidence Capture

Comprehensive trail and evidence packs to safeguard your organization

Log Books

Simplify data input and remove unwanted paper

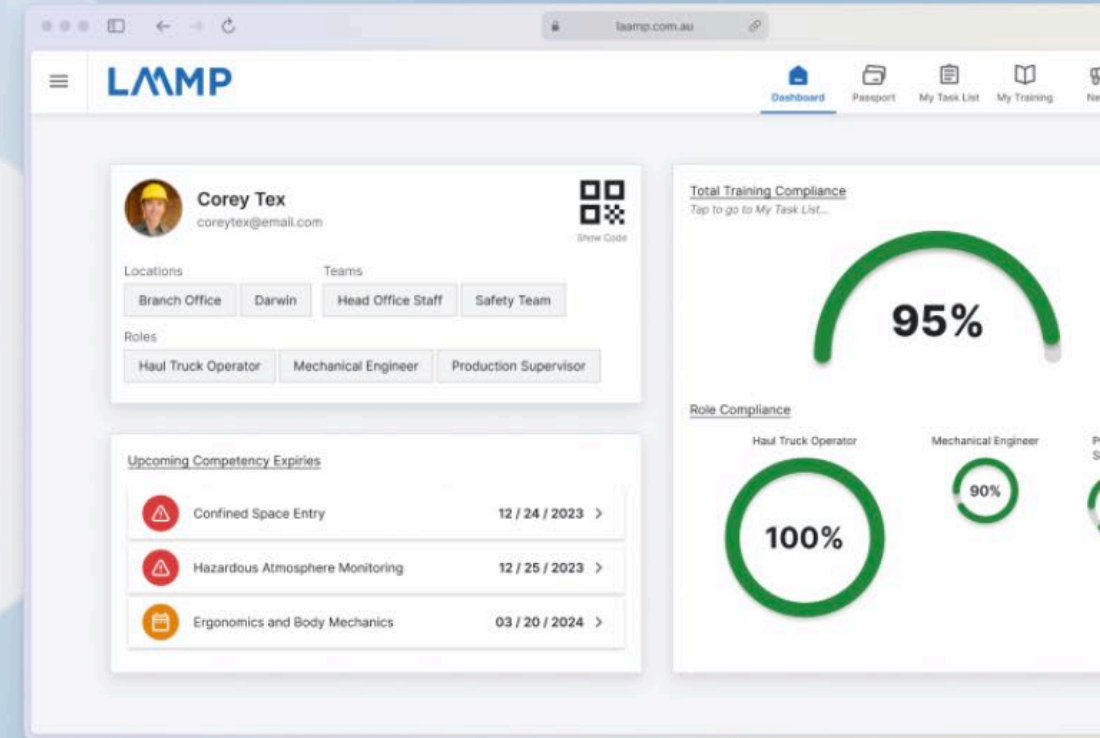

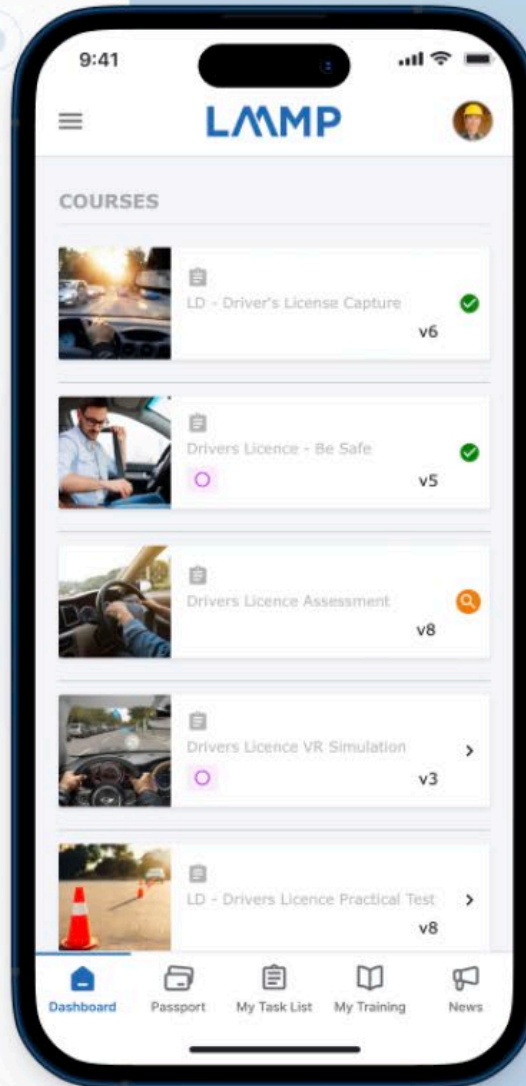

Practical Assessments

Digitise skills evaluation and verification of competence (VOC)

LAAMP

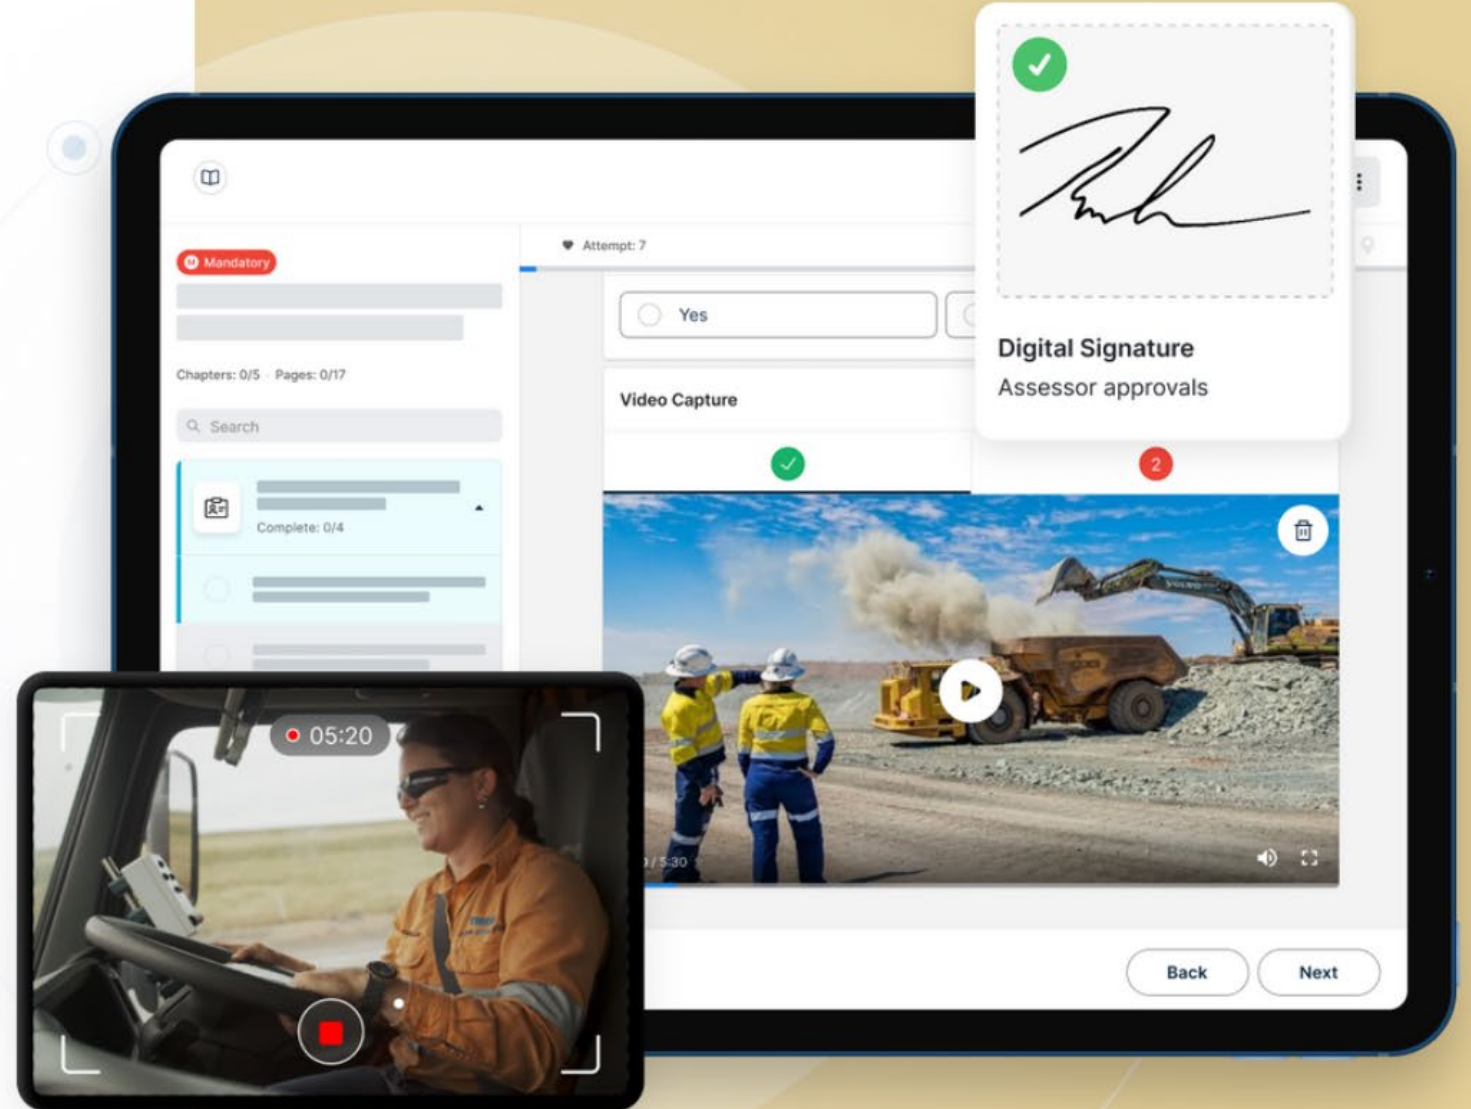

End User View

- ✓ Dashboards
- ✓ Verification
- ✓ My Training
- ✓ Digital Passports
- ✓ News & Announcements

Assessors View

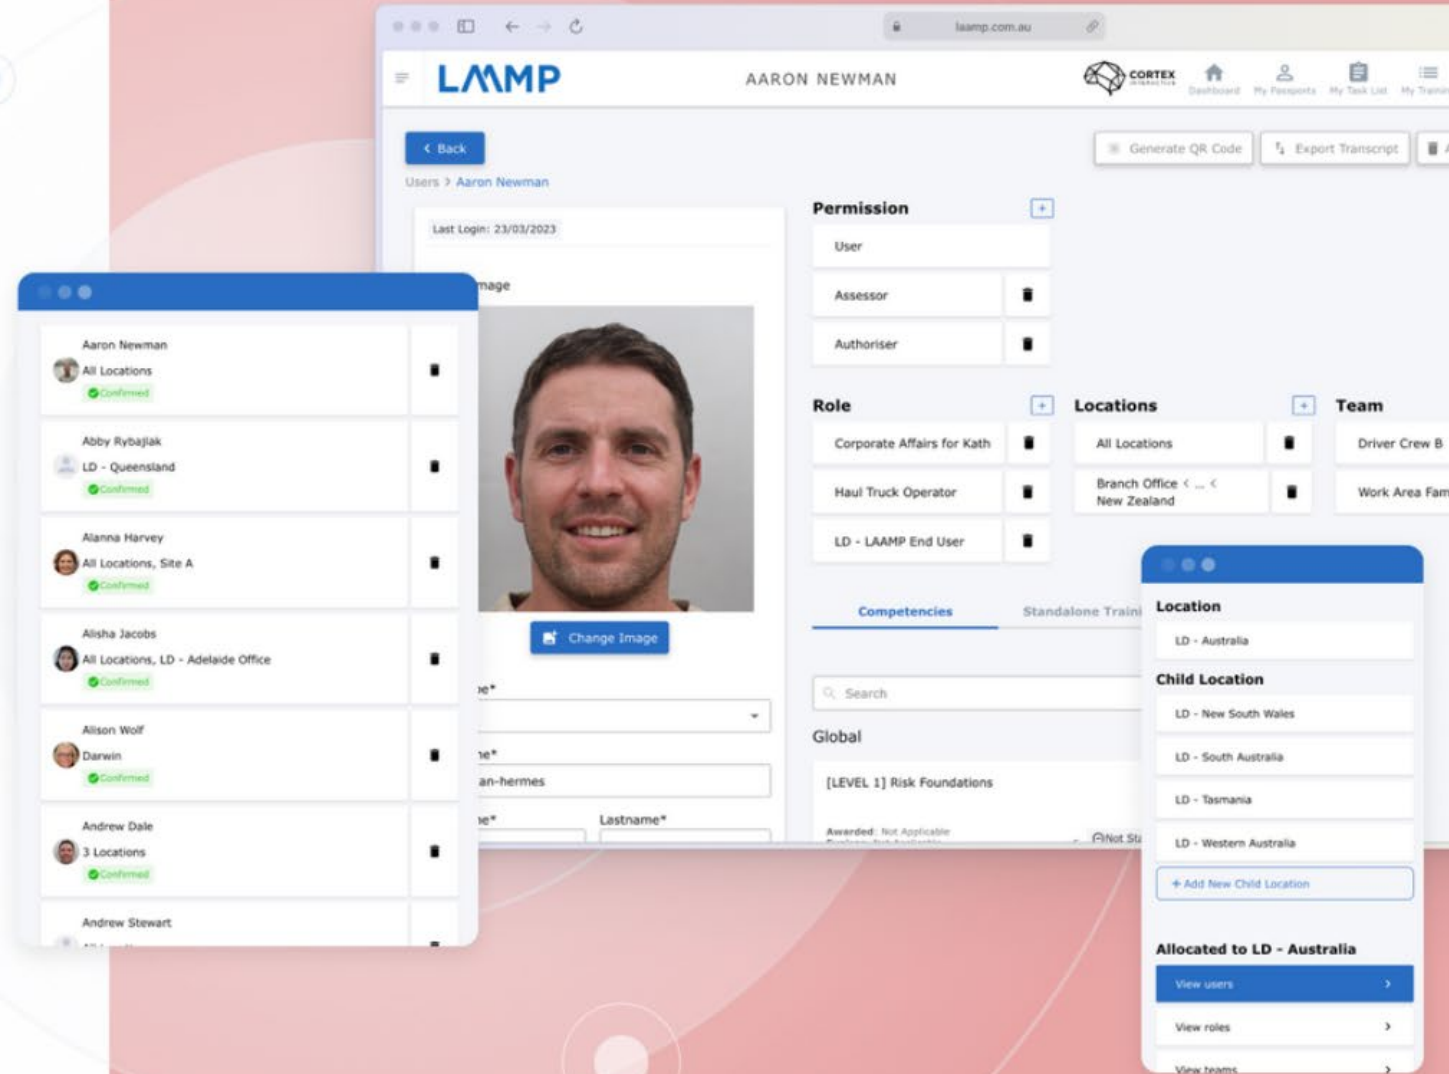

- ✓ Instant Access
- ✓ Personalised Assessment
- ✓ Evidence Capture
- ✓ Task-based Assessments
- ✓ Verification of Confidence
- ✓ Rapid Submissions

Administrator View

Administrators can effectively manage and optimise their entire workforce.

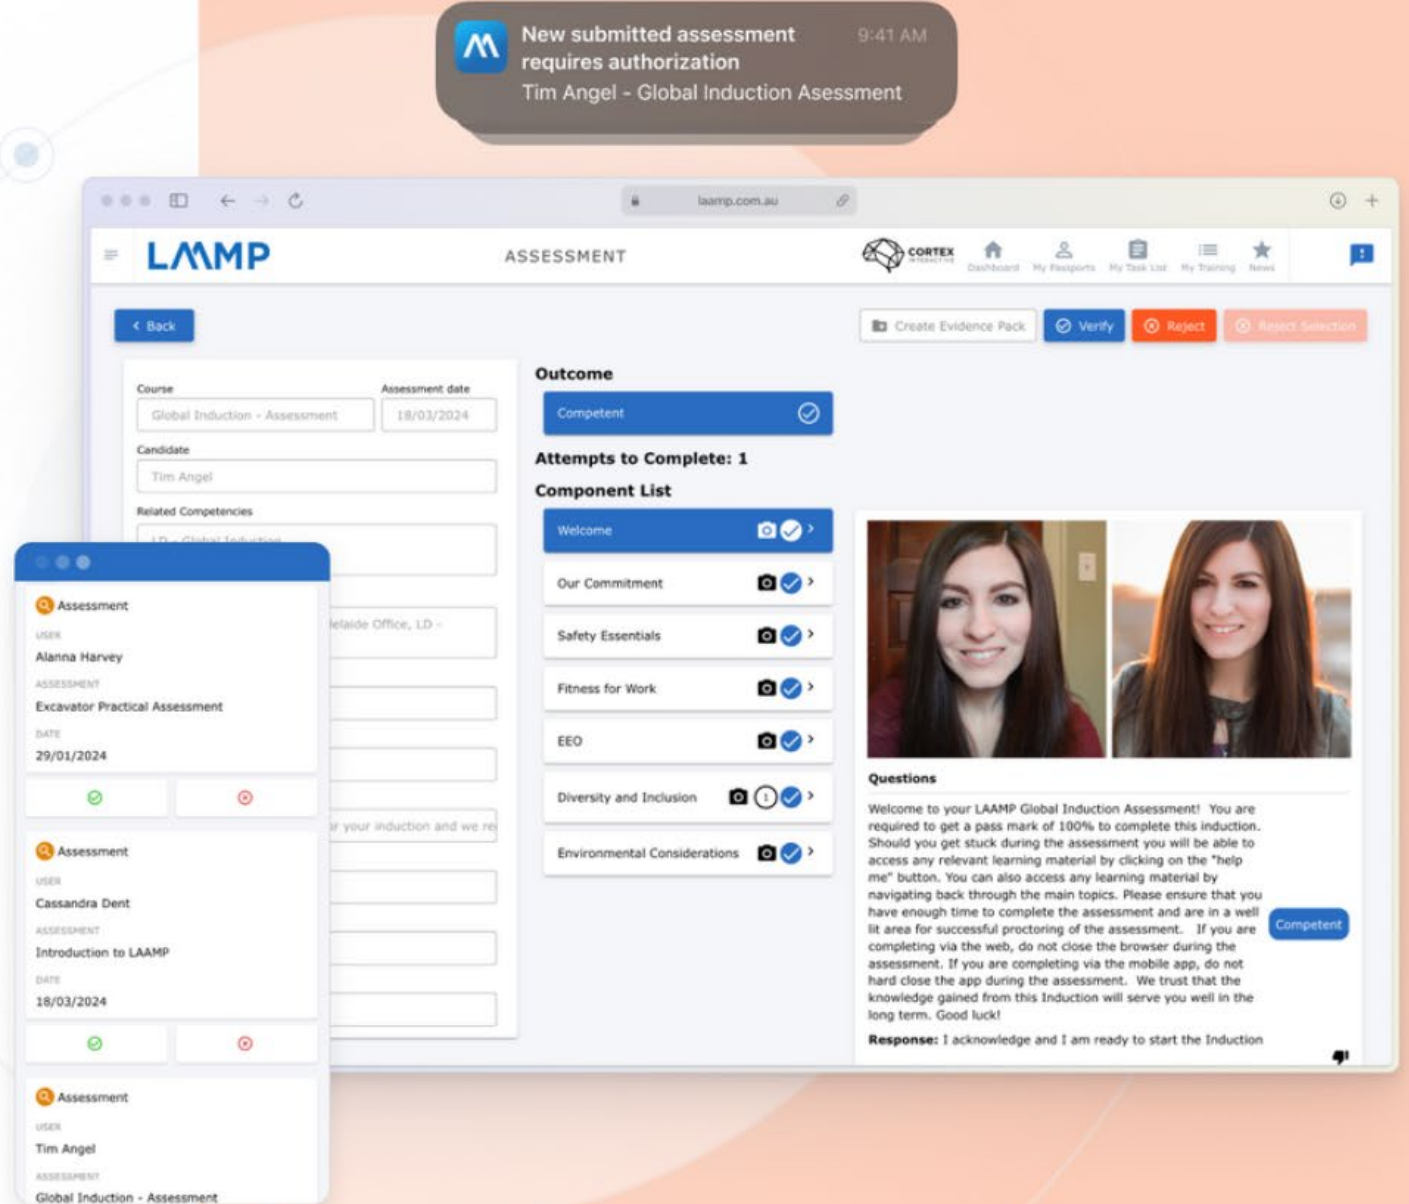

- ✓ Automated Admin
- ✓ Visible workforce hierarchy
- ✓ Training needs analysis
- ✓ Bulk User imports & security
- ✓ Centralised Control
- ✓ Complete Audit Trail

Authorisers View

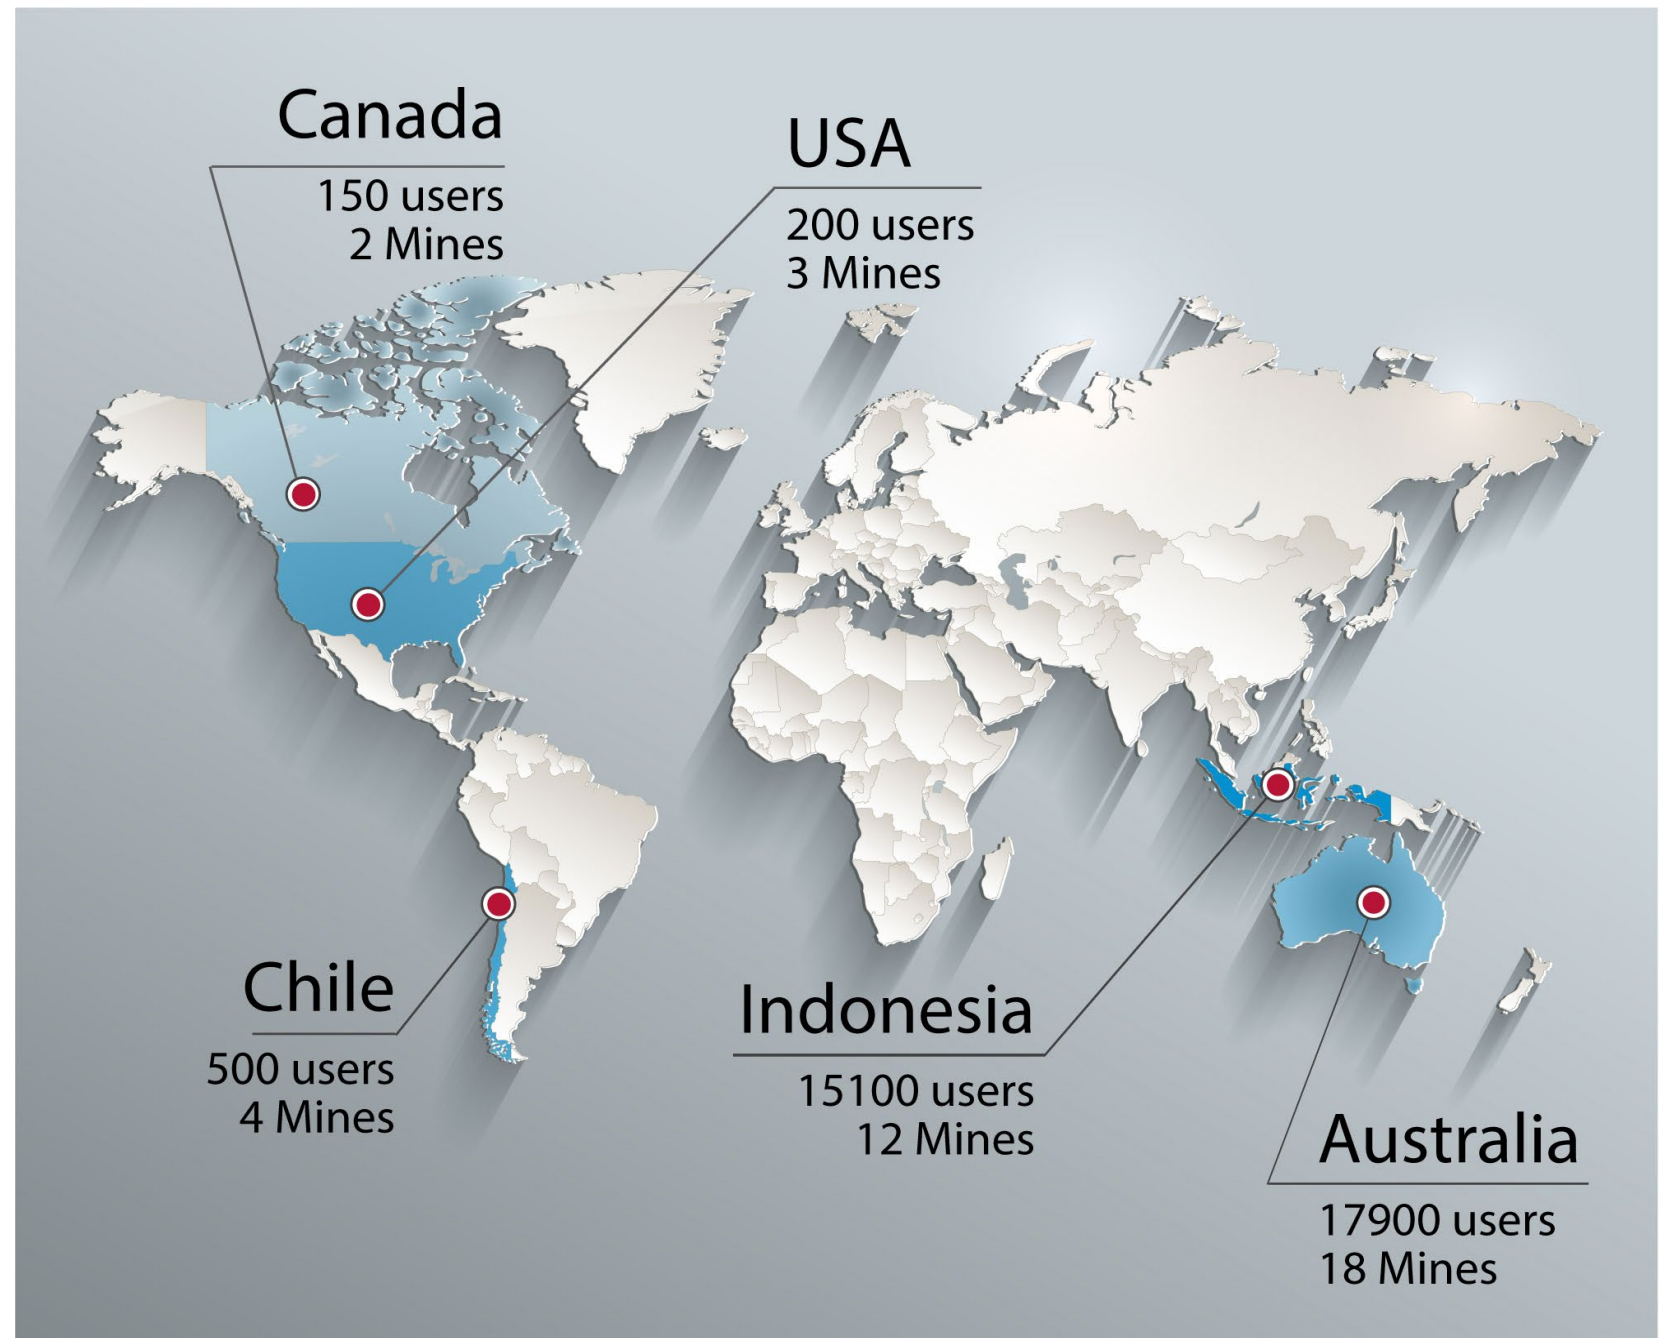

Approvers and authorisers can ensure that all training and assessments are thoroughly vetted.

- ✓ Automated Workflows
- ✓ Comprehensive audit trails
- ✓ Real-time notifications
- ✓ Centralised Lists
