

Drug & Alcohol Screening Services

Drug & Alcohol screening can be provided as part of any medical.

It can also be provided as a scheduled or random onsite visit.

Employers have a duty of care to ensure the health and safety of their workers by minimising workplace risks.

Drug and alcohol screening is one way to manage or reduce work-related risks associated with the consumption of alcohol or drug use by workers.

Our services include:

- Instant breath alcohol analysis
- Instant urine drug screening and
- Sample collection for detailed pathology analysis

These services can be provided as part of any medical or as a stand-alone service performed at any CS Health office or as a random onsite visit.

We are accredited by the National Association of Testing Authorities (NATA) to:

- ISO/IEC 17025:2018 - *General requirements for the competence of testing and calibration laboratories*
- AS/NZS 4308:2008 - *Procedures for specimen collection and the detection and quantitation of drugs of abuse in urine.*

Accreditation ensures we maintain a high standard of urine drug screening and provide reliable results.

Why is drug and alcohol screening important?

- Helps you to comply with statutory obligations
- Provides peace of mind that your workers are fit for duty
- Reinforces your site's safety culture

Why use CS Health?

- CS Health is an independent, NATA-accredited provider
- Our qualified staff will perform the screening per your work site requirements. They will assist you to resolve any issues that may arise on the screening day, such as Adulterated or Non-Negative results.
- Onsite screening means less interruption to your workplace. Before services commence, we will visit your site to conduct a safety audit and ensure the proposed facilities are appropriate for screening purposes.
